PROJECTS

E-commerce Platforms (React.js, Redux, Tailwind CSS).

- Developed an interactive product catalog with filtering and sorting features.
- Built a shopping cart with Redux Toolkit for state management.
- Ensured a responsive and user-friendly shopping experience across all devices.

[Project 1](#)

[Project 2](#)

[Project 3](#)

Blog Website (Next.js, TypeScript, API Integration)

- Created a dynamic blog platform fetching and displaying articles from an API.
- Implemented server-side rendering (SSR) for improved performance.
- Integrated basic authentication for personalized content.

[Project 1](#)

Course Registration App (React.js, Tailwind CSS)

- Built a web app to register and manage student courses.
- Implemented form validation, input filtering, and responsive layouts.
- Stored course data locally and allowed real-time updates.

[Project 1](#)

Weather App (JavaScript, API Integration)

- Created a weather forecast app using the OpenWeatherMap API.
- Implemented search by city name and dynamic UI updates.
- Displayed real-time temperature, weather icons, and descriptions.

[Project 1](#)

To-Do List App (JavaScript, LocalStorage)

- Developed a task management tool with add, delete, and edit functionalities.
- Used LocalStorage to persist data across sessions.
- Styled using custom CSS for a clean, intuitive interface.

[Project 1](#)

Portfolio Website (React.js, Tailwind CSS)

- Designed and built a personal portfolio to showcase skills and projects.
- Optimized for fast loading speeds and SEO best practices.
- Added a dark/light mode toggle for better accessibility.
